

SAMUVEL V

SOFTWARE DEVELOPER

PROFILE

I am a curious learner and creative team player, passionate about a career as a Software Developer. With 2 years of extensive experience in developing Angular applications and APIs using .NET technologies, I bring expertise in creating robust web solutions. I have a strong background in mobile application development using the Ionic framework. Additionally, I am skilled in Oracle PL/SQL, writing efficient queries and procedures. My goal is to leverage my skills and experience to deliver innovative software solutions that meet client specifications and enhance the company's reputation, continuously enhancing my professional growth.

WORK EXPERIENCE

■ 2022 - PRESENT(2024)

Manappuram Comptech And Consultants Limited /
Thrissur - Kerala

DOT NET Developer

- **Frontend Development with Angular:** Developed and maintained dynamic and responsive user interfaces using Angular. Implemented complex forms, custom components, and reusable UI elements, improving the overall user experience and application performance.
- **Backend Development with ASP.NET (C#):** Built and optimized server-side applications using ASP.NET and C#. Created RESTful APIs and integrated them with frontend applications, ensuring secure and efficient data exchange. Enhanced application performance through caching strategies and optimized database queries.
- **Database Management with PL/SQL:** Designed and optimized database schemas, wrote complex SQL queries, and created stored procedures using PL/SQL. Managed data migration, performed database tuning, and ensured data integrity across various environments.
- **Mobile Development with Ionic:** Developed cross-platform mobile applications using Ionic, ensuring seamless integration with backend services and delivering a consistent user experience. Implemented native features like push notifications and offline storage.
